

Cryptophone CP 300

TECHNICAL SPECIFICATIONS

Radio

Quad-Band GSM 850/900/1800/1900 MHz

Voice Encryption

Strongest and most secure algorithms available today - AES256 and Twofish, 4096 bit Diffie- Hellman key exchange with SHA256 hash function, readout-hash based key authentication, 256 bit effective key length encryption, key is destroyed as soon as the call ends.

Message Encryption

Based on the same strong encryption algorithms used for GSMK Cryptophone voice encryption – 4096 bit Diffie-Hellman initial key exchange, AES256 and Twofish message encryption with a 256 bit effective key length. Supports long SMS encrypted self-destructing “Eyes-only” SMS and smart folders. Includes fully encrypted storage system for contacts, messages and keys.

GSMK CryptoPhones are the only secure mobile phones on the market with full source code published for independent security assessments - no `proprietary` or `secret` encryption, no backdoors, no key-escrow, no centralized or operator-owned key generation, no key registration.

Interoperability

Fully compatible with all GSMK CryptoPhone cellular, satellite and fixed-line products.

Dimensions & Weight

109 x 59 x 17mm, 168g incl. battery, black colour scheme, integrated antenna

Operational Features

Talk time up to 4 hours, standby time 200 hours

Standard Accessories

100-240V AC adapter, USB sync cable, stereo headset with microphone

Satellite Upgrade Option

Upgradeable to dual-mode secure GSM and Thuraya satellite communications using the GSMK CryptoPhone T2 upgrade package

Trustworthy Voice & SMS Encryption

The CryptoPhone 300 comes with full source code available for independent review. Finally, you can perform an independent assessment to ensure that you can rely on strong encryption without any backdoors in the communications device that you entrust your security to. The GSMK CryptoPhone 300 enables you to put the trust where it belongs – in a trustworthy, open and scientific verification process.

GSMK CryptoPhone technology is based on well researched algorithms for both encryption and voice processing. It features the strongest encryption available combined with key lengths that provide peace of mind today and in the future.

Generic GSM Services

Call holding, waiting, forwarding, barring, Calling Line Identification (CLI), Short Message Service (SMS), network selection, cell broadcast

Connectivity

Mini-USB connector (Slave USB, Power In) with integrated audio connector, MicroSD memory card slot (SD 2.0 compatible), Wireless LAN IEEE 802.11b/g, Bluetooth 2.0 (Supported profiles: Serial Port Profile, Hands Free Profile, Human Interface Device Profile, File Transfer Profile, Object Push Profile, SIM Access Profile, Advanced Audio Distribution Profile A2DP, Audio Video Remote Control Profile, Personal Area Network Profile)

Display

Sunlight-readable 2.8" transfective TFT LCD screen with LED backlight, 240 x 320 pixels, 64k colours

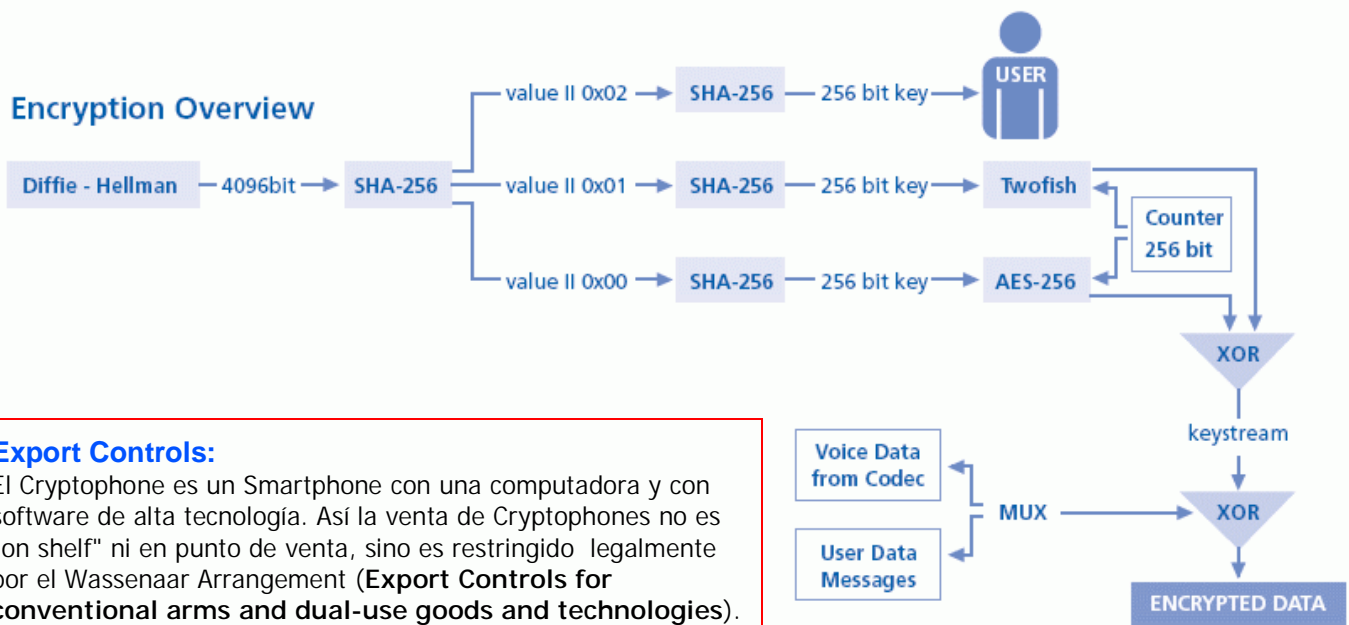

Keyboard / Buttons

2.8" touch screen, auto-sliding QWERTY keyboard, talk / hang-up buttons, 5-way navigation keypad plus softkeys and dedicated network, voice recorder and camera capture buttons, volume up / down buttons

CMOS Camera

with 2,0 megapixels resolution (can be completely disabled upon request)

Encryption Overview

Export Controls:

El Cryptophone es un Smartphone con una computadora y con software de alta tecnología. Así la venta de Cryptophones no es "on shelf" ni en punto de venta, sino es restringido legalmente por el Wassenaar Arrangement (**Export Controls for conventional arms and dual-use goods and technologies**).
